Acura check engine light (CEL) turns on to let you that the engine control unit (ECU) has detected a problem. A fault code is stored in the Engine Control Unit (ECU) and can be retrieved with an OBD-II scanner, as shown below. When your Acura check engine light remains on, the problem could be something as simple as a loose gas cap. It can also indicate a serious engine issue, a problem with the emission system, or in some cases even an indication of a problem with the automatic transmission ...

Acura Check Engine Light On Troubleshoot Guide | YOUCANIC

Most common reasons for a check engine light in Acura. When you first start up your engine, your dashboard warning lights will trigger for a second, then switch off. Your check engine light, or what Acura frequently calls the malfunction indicator lamp, may stay on for a few seconds, but it should turn off under normal conditions. Which is why it can make you nervous if it stays on.
