A Designers Guide To Fire

STA Launches Fire Safety Guidance for the Construction Industry Surrounding Timber Frame Properties. The Structural Timber Association (STA) has launched its ' Designers Guide to Structural Timber Frame fire safety during construction ' video for the construction industry. Funded by a CITB bid and produced with input from the HSE, the video succeeds the STA ' s previous fire safety CPD, bringing legislation up to date and presenting the information in an easy to digest format.

STA Launches Fire Safety Guidance Structural Timber ...

The main design options to ensure fire safety are: Prevention: controlling ignition and fuel sources so that fires do not start. Communications: if ignition occurs, ensuring occupants are informed and any active fire systems are triggered. Escape: ensuring that occupants of buildings and surrounding areas are able to move to places of safety .

Fire safety design - Designing Buildings Wiki

This includes the publication Ensuring Best Practice for Passive Fire Protection in Buildings, which describes itself as " guidance intended to offer architects, designers, constructors, building occupiers and others, effective and feasible recommendations and selection criteria for the use of passive fire protection systems in buildings " .

To assist in the design, specification and installation of building services penetrations to ensure fire compartmentation is maintained, five leading not-for-profit organisations have launched a Best Practice Design and Installation Guide, Firestopping of Service Penetrations. The aim of the guide is to encourage all stakeholders in construction to consider firestopping design earlier in the process in order to avoid problems at a later stage in construction.

Dry riser - Designing Buildings Wiki - Share your construction industry knowledge. Dry risers are used to supply water within buildings for fire-fighting purposes. The provision of a built-in water distribution system means that fire fighters do not need to create their own distribution system in order to fight a fire and it avoids the breaching of fire compartments by running hose lines ...
