A playful guide to liberating oral sex from the author of Red Hot Touch. Including how to give your partner her most mind-blowing orgasm, to adventurous new oral positions to try out with your man, Blow Each Other Away will quickly become your favorite new bedside companion. How can a book on going down change someone's life? How can having great oral sex be as important as having great intercourse? The truth is that oral sex can actually be the key to unlocking sexual confidence, excitement, and intimacy. With the increasing prevalence of oral sex in the media and news (thanks, politicians and the MTV generation!), more people are looking to take their oral game to the next level. Unfortunately, shame, fear, and discomfort can stand in the way of a truly outstanding oral sex life. That's where author and sex therapist Jaiya comes in. Blow Each Other Away is the ultimate guide for couples to overcome the obstacles that stand in the way of incredible oral sex, from an author on the front lines of sex therapy and sexual wellness.

Discover a collection of short stories that will plunge you into the personal lives of a whole range of men and women - everyone from princesses to paupers and from sultans to sorcerers. You'll meet a princess whose best friend literally tries to steal her wedding, right down to her bridal shoes; a bride who mysteriously goes blind on her wedding day; a woman whose romantic Parisian honeymoon proves too good to be true; and a jealous wife who lures her husband into falling in love with another woman. These candid stories – sometimes moving, sometimes funny, and always entertaining and surprising – will resonate with readers round the world.

"Tells the story of migrants and communities in the Southeast Asian borderlands. The Black Flags raided their way from southern China into northern Vietnam, competing in the second half of the nineteenth century against other armed migrants and uplands communities

for control of commerce (e.g., opium) and natural resources (e.g., copper for making coins). At the edges of empires--the Qing empire in China, the Vietnamese empire governed by the Nguyen dynasty, and, eventually, French colonial Vietnam--the Black Flags and their rivals sustained networks of power and dominance through the framework of political regimes. The history of these imperial bandits and the communities that resisted them demonstrates the plasticity of borderlines, the limits of imposed boundaries, and the flexible division between apolitical banditry and political rebellion in the borderlands of China and Vietnam. Historical studies of these areas tend to examine events only from the perspective of local communities or from the anxious view of imperial officials. By focusing on the Black Flags, upland communities, and their relationships to various empires, this study illustrates borderland processes at the violent edges of empire. It contributes to the ongoing reassessment of borderland areas as frontiers for state expansion, arguing that projects of empire often were instruments of power for armed migrants and their allies, and that, as a setting for forms of human activity that defy tight boundaries, borderlands continued to exist well after the establishment of formal boundaries"--

Leo Fender launched the Stratocaster electric guitar in 1954, as an upgrade to his revolutionary Telecaster. The 'Strat' - streamlined, chrome-plated, efficient, fast and sexy - soon gained icon status. This practical 'how to' manual focuses on the 'Strat'.

In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

Algebra Part 1 is mathematics that are learned typically in elementary school as basic math. This can vary from multiple different math products, but allows the math to stay simple for those new to the math field. Algebra Part 1 can include addition, subtraction, multiplication, division, and possibly even more. Math is important to everyone in this world. Algebra Part 1 will benefit everyone as they head into the real world. Every job will require their employees to know basic math no matter what the type of job is. Math is used in every job and kids must learn it.
