A transmission line connects a generator to a load – a two port network

Transmission lines include (physical construction):

- Two parallel wires
- Coaxial cable
- Microstrip line
- Optical fiber
- Waveguide (very high frequencies, very low loss, expensive)
- etc.

Transmission
Lines

The transmission lines play a very important role in transmitting the huge quantum of electrical power generated at various generating stations to the whole area of the country from one end to other end over a distance of several hundreds of kilometers.
