74 thoughts on “ Dosage calculations the easy way! Dr. Rachel Silva DNP May 9, 2015 at 11:06 am. What an excellent resource you have created for nursing students! I certainly wish I could have had this to discover back when I was in nursing school (but we barely knew what computers were, haha).

~~Dosage calculations the easy way! — Straight A Nursing~~

The first problem I'm going to go over is how to calculate an oral dose. If your doctor prescribes like a tablet or a capsule, how do you calculate how many tablets or capsules your patient should get? In this particular problem, the order was for 0.4g of this medication, every 8 hours. What we have on hand are capsules with 200mg in each capsule.

~~Nursing Dosage Calculations: Example Problems with Answers ...~~

Practice Questions Practice your math skills with each of these questions. An explanation will be provided for each answer that is incorrect. If you find these questions useful, click here to sign up for the dosage calculation question of the day and click here to tell a friend about DosageHelp.com.

~~DosageHelp.com - Helping Nursing Students Learn Dosage ...~~

The aim of this guide is to learn how to calculate a drug dosage from the stock strength. This learning is divided into three parts. Part 1 will define the two formulas that can be used to calculate the drug dose required from stock strength for both oral tablets/capsules and oral liquid medicines.
