Freakonomics does not really reveal the hidden side of everything. Indeed, it's more likely to mislead you into thinking you've learned something, when you've only learned an interesting angle on a complex topic on which you may lack either the experience or methods needed to put it into a useful context.

bestselling professor of psychology Angela Duckworth. Which is more dangerous, a gun or a swimming pool? Which should be feared more: snakes or french fries? Why do sumo wrestlers cheat? In this groundbreaking book, leading economist Steven Levitt—Professor of Economics at the University of Chicago and winner of the American Economic Association's John Bates Clark medal for the economist under 40 who has made the greatest contribution to the discipline—reveals that the answers. Joined by acclaimed author and podcast host Stephen J. Dubner, Levitt presents a brilliant—and brilliantly entertaining—account of how incentives of the most hidden sort drive behavior in ways that turn conventional wisdom on its head.

In the summer of 2003, The New York Times Magazine sent Stephen J. Dubner, an author and journalist, to write a profile of Steven D. Levitt, a heralded young economist at the University of Chicago. Levitt was not remotely interested in the things that interest most economists. Instead, he studied the riddles of everyday life--from cheating to crime to child-rearing--and his conclusions turned the conventional wisdom on its head. Levitt and Dubner then collaborated on *Freakonomics*, a book that gives full play to Levitt's most compelling ideas. Through forceful storytelling and sharp insight, it reminds us all that economics is, at its root, the study of incentives--how people get what they want or need, especially when other people want or need the same thing. Among the questions it answers: Which is more dangerous, a gun or a swimming pool? If drug dealers make so much money, why do they still live with their mothers? What makes a perfect parent? And, of course: What do schoolteachers and sumo wrestlers have in common? (Answer: they both cheat.) Now this cultural blockbuster comes to trade paperback with exclusive extras-- including a new preface,

five Freakonomics columns from The New York Times Magazine, an exclusive author Q & A and a sneak preview of Superfreakonomics.

Freakonomics lived on the New York Times bestseller list for an astonishing two years. Now authors Steven D. Levitt and Stephen J. Dubner return with more iconoclastic insights and observations in SuperFreakonomics—the long awaited follow-up to their New York Times Notable blockbuster. Based on revolutionary research and original studies SuperFreakonomics promises to once again challenge our view of the way the world really works.

One of the greatest young American thinkers offers his provocative and intriguing insights into basic life issues--from cheating to child rearing--in this highly readable and challenging new work Which is more dangerous, a gun or a swimming pool? Which should be feared more: snakes or french fries? Who really deserves credit for the recent drop in crime? In this groundbreaking book, leading economist Steven Levitt--Professor of Economics at the University of Chicago and winner of the American Economic Association's 2004 John Bates Clark medal for the economist under 40 who has made the greatest contribution to the discipline--reveals that the answers to such questions lie in economic theory, a field he is revolutionizing. Joined by acclaimed author Stephen J. Dubner, Levitt offers his most compelling ideas as he explores the basic questions of everyday life, reaching conclusions that have turned conventional wisdom on its head. Brilliantly reasoned, told in compelling, forthright language, and filled with keen insight, What Do Schoolteachers and Sumo Wrestlers Have in Common? remind us that economics is ultimately the study of incentives and competition--how people get what they want,

or need, when others want or need the same thing.

As big and exciting as the next century, this is a novel of real life at our giddy, feverish, topsy-turvy edge of the millennium. Turn of the Century is a good old-fashioned novel about the day after tomorrow--an uproarious, exquisitely observed panorama of our world as the twentieth century morphs into the twenty-first, transforming family, marriage, and friendship and propelled by the supercharged global businesses and new technologies that make everyone's lives shake and spin a little faster. As the year 2000 progresses, George Mactier and Lizzie Zimbalist, ten years married, are caught up in the whirl of their centrifugally accelerating lives. George is a TV producer for the upstart network MBC, launching a truly and weirdly groundbreaking new show that blurs the line between fact and fiction. Lizzie is a software entrepreneur dealing with the breakneck pleasures and pains of running her own company in an industry where the rules are rewritten daily. Rocketing between Los Angeles and Seattle, with occasional stopovers at home in Manhattan for tag-team parenting of their three children, George and Lizzie are the kind of businesspeople who, growing up in the sixties and seventies, never dreamed they would end up in business. They're too busy to spend the money that's rolling in, and too smart not to feel ambivalent about their crazed, high-gloss existences, but nothing seems to slow the roller-coaster momentum of their inter-secting lives and careers. However, after Lizzie, recovering from a Microsoft deal gone awry, becomes a confidante and adviser to George's boss, billionaire media mogul Harold Mose, the couple discovers that no amount of sophisticated spin can obscure basic instincts: envy, greed, suspicion, sexual temptation--and, maybe, love. When they and their children are finally drawn into a thrilling, high-tech corporate hoax that sends Wall Street reeling (and makes

one person very, very rich), George and Lizzie can only marvel at life's oversized surprises and hold on for dear life. Like Tom Wolfe's *Bonfire of the Vanities*, Kurt Andersen's *Turn of the Century* lays bare the follies of our age with laser-beam precision, creating memorable characters and dissecting the ways we think, speak, and navigate this new era of extreme capitalism and mind-boggling technology. Entertaining, imaginative, knowing, and wise, *Turn of the Century* is a richly plotted comedy of manners about the way we live now.

In celebration of the 10th anniversary of the landmark book *Freakonomics* comes this curated collection from the most readable economics blog in the universe. It's the perfect solution for the millions of readers who love all things *Freakonomics*. Surprising and erudite, eloquent and witty, *When to Rob a Bank* demonstrates the brilliance that has made the *Freakonomics* guys an international sensation, with more than 7 million books sold in 40 languages, and 150 million downloads of their *Freakonomics Radio* podcast. When *Freakonomics* was first published, the authors started a blog—and they've kept it up. The writing is more casual, more personal, even more outlandish than in their books. In *When to Rob a Bank*, they ask a host of typically off-center questions: Why don't flight attendants get tipped? If you were a terrorist, how would you attack? And why does KFC always run out of fried chicken? Over the past decade, Steven D. Levitt and Stephen J. Dubner have published more than 8,000 blog posts on *Freakonomics.com*. Many of them, they freely admit, were rubbish. But now they've gone through and picked the best of the best. You'll discover what people lie about, and why; the best way to cut gun deaths; why it might be time for a sex tax; and, yes, when to rob a bank. (Short answer: never; the ROI is terrible.) You'll also learn a
