Almost everyone has heard of the Nobel Prize, a collection of prizes awarded for accomplishments in science, medicine, literature, and peace. But few people know about the man who established the award and for whom it is named, Alfred Nobel. Alfred Nobel was born in Sweden in 1833. A quick and curious mind, combined with a love of science and chemistry, drove him to invent numerous technological devices throughout his long life. But he is perhaps most well known for his invention of dynamite. Intending it to help safely advance road and bridge construction, Nobel saw his most famous invention used in the development of military weaponry. After a newspaper headline mistakenly announces his death, Nobel was inspired to leave a legacy of another sort. *The Man Behind the Peace Prize* tells the story of the enduring legacy of Alfred Nobel. Kathy-jo Wargin is the bestselling author of more than 30 books for children. Among her many awards for her work are an International Reading Association Children's Choice Award for *The Legend of the Loon* and an IRA Teachers' Choice Award for *Win One for the Gipper*. She lives in the Great Lakes area. Zachary Pullen's character-oriented picture book illustrations have won awards and garnered starred reviews. He has been honored several times with acceptance into the prestigious Society of Illustrators juried shows and Communication Arts Illustration Annual of the best in current illustration. Zachary lives in Wyoming.

A history of the Nobel Prize reveals the biases and controversies inherent in the choosing of award winners in each field, scandals, corruption, and the problems stemming from a refusal to change with modern times.

A *Forbes*, *Physics Today*, *Science News*, and *Science Friday* Best Science Book Of 2018 The inside story of a quest to unlock one of cosmology's biggest mysteries, derailed by the lure of the Nobel Prize. What would it have been like to be an eyewitness to the Big Bang? In 2014, astronomers wielding BICEP2, the most powerful cosmology telescope ever made, revealed that they'd glimpsed the spark that ignited the Big Bang. Millions around the world tuned in to the announcement broadcast live from Harvard University, immediately igniting rumors of an imminent Nobel Prize. But had these cosmologists truly read the cosmic prologue or, swept up in Nobel dreams, had they been deceived by a galactic mirage? In *Losing the Nobel Prize*, cosmologist and inventor of the BICEP (Background Imaging of Cosmic Extragalactic Polarization) experiment Brian Keating tells the inside story of BICEP2's mesmerizing discovery and the scientific drama that ensued. In an adventure story that spans the globe from Rhode Island to the South Pole, from California to Chile, Keating takes us on a personal journey of revelation and discovery, bringing to vivid life the highly competitive, take-no-prisoners, publish-or-perish world of modern science. Along the way, he provocatively argues that the Nobel Prize, instead of advancing scientific progress, may actually hamper it, encouraging speed and greed while punishing collaboration and bold innovation. In a thoughtful reappraisal of the wishes of Alfred Nobel, Keating offers practical solutions for reforming the prize, providing a vision of a scientific future in which cosmologists may, finally, be able to see all the way back to the very beginning.

Tagore's treatment of caste culture, bureaucracy and poverty paint a vivid portrait of nineteenth century India and all are interwoven with Tagore's perceptive eye for detail, strong sense of humanity and deep affinity for the natural world. Tagore's stories continue to rise above geographic and cultural boundaries to capture the imaginations of readers around the world. This collection contains some of the best stories of Tagore who put India on the literary map of the world. Translated from Bengali to English, these stories depict the human condition in its many forms—innocence and childhood, love and loss, the city and the village, the natural and the supernatural. Prominent among the stories are the famous 'The Cabuliwallah', which has also been adapted as a movie. The book also gives an insight into the socio-economic conditions prevalent in Colonial Bengal.

Lively and engaging conversations with 24 Nobel Prize winners, revealing their stories and providing inspiration for the next generation.
