However, most have little direct reference to industrial ventilation, but these codes need to be checked. Duct system: The ventilation system in a building consists of air moving devices such as fans and blowers and a network of ducts to exhaust the contaminated indoor air and to bring in air from the outside of the building.

Industrial Ventilation: A Manual of Recommended Practice ...

On top of that, having an industrial ventilation system will eliminate the need to completely overhaul your processes. If you 're using harmful chemicals, having good ventilation is a decent substitute as you look for alternatives. After fabrication and installation, a well-designed ventilation system removes the contaminated air in minutes.
