Super Minds is a seven-level course for young learners. This exciting seven-level course enhances your students' thinking skills, improving their memory along with their language skills. Super Minds develops language with creative activities including role play and project work, explores social values with lively stories and encourages cross-curricular thinking with fascinating 'English for school' sections. For ease of use, this Level 4 Teacher's Book is interleaved with pages from the Student's Book. It includes detailed lesson aims, clear instructions and a vast array of extra activities.

The practice of radiology education: challenges and trends will provide truly helpful guidance for those of you involved in teaching and training in radiology. The goal of this book is ultimately to improve patient care. As a companion piece to the first book radiology education: the scholarship of teaching and learning, this book focuses on applying the concepts at a practical level that can be applied flexibly within educational programs for radiology residents and fellows in any medical imaging learning environment. This book focuses on the application of scholarship in terms of the "dissemination of

useful, testable and reproducible information to others. " It links educational theory with practice and for those of you who wish to explore educational practice further, a number of chapters suggest additional readings and resources. The publication is timely and congruent with one of the most important twenty-first century trends in medical education: the move from amateurism to professionalism in teaching. In the past, medical schools and other health professions' training institutions have been criticized for their resistance to the adoption of the science of medical education. Very few of us learned how to teach as medical students and most of us have our teaching responsibilities thrust on us with little preparation. The award of a basic medical degree was assumed to carry with it basic teaching expertise, unfortunately an unwarranted assumption in some cases.

Describes the work of Meg Lowman in the rainforest canopy, an area unexplored until the last ten years and home to previously unknown species of plants and animals.
