This manual is way over rated. Some of the math that is used in the manual is just plain wrong and they know it. Dr. Wheeler's books are far superior. Just because the AIAG publishes the manual it does not mean you have to use it. None of the quality standards say what reference material to use. They just say you have to perform MSA to become ...

The example in the AIAG MSA reference manual (4th Edition) does show 50 samples. This is referred as based on a Ppk estimate of 0.5 for the underlying process. However this is not necessarily the sample size that is recommended under all circumstances. On the matter of sample size, I quote the AIAG reference manual (page 140)
