A leading consumer advocate reveals how to protect your money, time, and integrity from corrupt businesses. Once upon a time store prices were simple and fair, businesses stood behind their products with guarantees free of fine print and loopholes, and companies genuinely seemed to care about their valued customers—but those days are long gone. In this groundbreaking exposé, consumer advocate Christopher Elliot reveals the broken relationship between American consumers and businesses and explains how companies came to believe that fooling their customers was a viable, and profitable, business plan. Scammed explores how companies control information to mislead, distort the truth, and even outright lie to their consumers. Exposes the various ways companies have led their war against information—from seductive ads, disingenuous fine print, and unconventional promotions that involve seeding discussion forums and blogs with company-friendly comments. Offers consumers insider knowledge of the system, reasonable expectations, and a clear understanding of the games businesses play. Christopher Elliott is one of the nation's foremost consumer advocates. Protect yourself, your time, and your money from the predators of the consumer world. Armed with knowledge, readers will become far more discerning and every business's worst nightmare.

The Workshop on the Economics of Information Security (WEIS) is the leading forum for interdisciplinary scholarship on information security, combining expertise from the fields of economics, social science, business, law, policy and computer science. Prior workshops have explored the role of incentives between attackers and defenders, identified market failures dogging Internet security, and assessed investments in cyber-defense. Current contributions build on past efforts using empirical and

analytic tools to not only understand threats, but also strengthen security through novel evaluations of available solutions. Economics of Information Security and Privacy III addresses the following questions: how should information risk be modeled given the constraints of rare incidence and high interdependence; how do individuals' and organizations' perceptions of privacy and security color their decision making; how can we move towards a more secure information infrastructure and code base while accounting for the incentives of stakeholders?

Comment s'assurer d'offrir le meilleur contenu web possible dans tous les contextes d'utilisation ? Karen Mc Grane répond à cette question en partant du principe que ce n'est pas à vous de décider avec quel appareil ou quelle plate-forme vos clients vont accéder au contenu que vous proposez : c'est un choix qui leur revient. Cette spécialiste en stratégie de contenu et en architecture de l'information vous enseigne ici tous les fondamentaux pour mettre en oeuvre du contenu sur des appareils mobiles (et bien d'autres...). Vous y découvrirez une mine de ressources et des données plaidant en faveur d'une stratégie mobile puis apprendrez à publier sur plusieurs canaux en toute flexibilité.

This is a multidisciplinary study of the early contact period of Alaskan Native history that follows a major hunting and fishing Inupiaq group at a time of momentous change in their lifeways. The Amilgaqtau yaagmiut were the most powerful group in the Kobuk River area. But their status was forever transformed thanks to two major factors. They faced a food shortage prompted by the decline in caribou, one of their major foods. This was also the time when European and Asian trade items were first introduced into their traditional society. The first trade items to arrive, a decade ahead of the Europeans themselves, were glass beads and pieces of metal that the Inupiat expertly incorporated into their traditional implements. This book integrates ethnohistoric, bio-anthropological, archaeological, and oral historical analyses.

Topological Modelling of Nanostructures and Extended Systems completes and expands upon the previously published title within this series: The Mathematics and Topology of Fullerenes (Vol. 4, 2011) by gathering the latest research and advances in materials science at nanoscale. It introduces a new speculative area and novel concepts like topochemical reactions and colored reactive topological indices and provides a better understanding of the physical-chemical behaviors of extended systems. Moreover, a charming new family of space-filling fullerene crystals is here analyzed for the first time. Particular attention is given to the fundamental influences exercised by long-range connectivity topological mechanisms on the chemical and physical properties of carbon nanostructures. Systems consisting in graphenic layers with structural and topological defects are investigated in their electronic and magnetic behaviors also in presence of metallic particles. More specifically, the book focuses on: - Electronic Properties of low dimensional nanostructures including negatively-curved carbon surfaces; Pariser-Parr-Pople model hamiltonian approach to graphene studies; - Topochemistry and Toporeactivity of extended sp<sup>2</sup>-nanocarbons: PAH, fullerenes, nanoribbons, Moebius-like nanoribbons, nanotubes and grapheme; - Novel class of crystal networks arising from spanning fullerenes; - Nanostructures and eigenvectors of matrices and an extended treatise of topological invariants; - Enumeration hetero-fullerenes by Polya theory. Topological Modelling of Nanostructures and Extended Systems represents a valuable resource to advanced graduates and researchers working in mathematics, chemistry, physics and material science.

Es una revista especializada en el sector tecnológico, donde podrás encontrar las últimas innovaciones tecnológicas implementadas en productos de consumo. El contenido incluye secciones de fotografía y

video digital, telefonía celular, computadoras portátiles y de escritorio, accesorios y periféricos electrónicos, además de otros dispositivos portátiles, como los MP3 y MP4, así como lo último en alta definición (Blu Ray) y pantallas de LCD y plasma. Por otro lado, se incluyen evaluaciones técnicas de diversos componentes, los principales estrenos en la cartelera cinematográfica, los más recientes lanzamientos en DVD y Videojuegos, y por último, la sección de estilo de vida, con información variada sobre los gadgets y accesorios que te harán la vida más fácil.
