In a 1970 review of *The Poetry of Robert Frost*, the poet Daniel Hoffman describes Frost's early work as "the Puritan ethic turned astonishingly lyrical and enabled to say out loud the sources of its own delight in the world," and comments on Frost's career as the "American Bard": "He became a national celebrity, our nearly official poet laureate, and a great performer in the tradition of that earlier master of the literary vernacular, Mark Twain."

"Wise old Vergil says in one of his Georgics, 'Praise large farms, stick to small ones,'" Robert Frost told a friend. "Twenty acres are just about enough." Frost started out as a school teacher living the rural life of a would-be farmer, and later turned to farming full time when he bought a place of his own. After a sojourn in England where his first two books--*A Boy's Will* and *North of Boston*--were published to critical acclaim, he returned to New England, acquired a new farm and became a rustic for much of the rest of his life. Frost claimed that all of his poetry was farm poetry. His deep admiration for Virgil's Georgics, or poems of rural life, inspired the creation of his own New England "georgics." This body of work can be seen as his answer to the haughty 20th-century modernism that seemed certain to define the

In writing this book, my intention is to fill a need not met by any of the excellent critical books and collections of essays about Robert Frost's poems. A few of these books provide analysis of up to 50 or 60 of Frost's poems. But none offers, as this work does, a basic commonsensical explication of all 355 poems in The Poetry of Robert Frost (1969), edited by Edward Connery Lathem, now the standard collection of Frost's poems. - from the Introduction by the author.
