The term pseudoscience refers to beliefs and practices that claim to be scientific but lack the true method and essence of science.

They have the patina of legitimate science, but something has gone wrong.

Pseudoscience goes beyond just making a few errors or a few sloppy practices. The methods are so flawed that the entire endeavor is suspect.

How Can We Differentiate Between Science and Pseudoscience?

The scientific method is arguably the most important element of science. Without it science itself would be practically meaningless. Science is defined as: “ the intellectual and practical activity encompassing the systematic study of the structure and behaviour of the physical and natural world through observation and
