~~While there is a growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's 2nd edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on ...~~

The Fifth Edition of International Accounting provides an overview of the broadly defined area of international accounting, but also focuses on the accounting issues related to international business activities and foreign operations. This edition also includes substantially updated coverage of the International Accounting Standards Board (IASB) and International Financial Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

'This work is recommended for corporate libraries whose companies are involved in international business, and for academic libraries affiliated with colleges of business.' - Kay M. Stebbins, Choice This project is distinctive in that it really is a 'Who's Who' rather than a directory of all scholars engaged in international business education and research.

'International Accounting' provides an overview of the broadly defined area of international accounting, focusing on the accounting issues related to international business activities and foreign operations.

In this volume, we examine how the institutional environment affects entrepreneurial organizations, and vice-versa. This includes not only how the institutional environment constrains both founding processes and the type of organizations founded, but also how institutional dynamics construct new entrepreneurial opportunities, empower and facilitate action, and how entrepreneurs manipulate the institutional environment to serve their own ends. This institutional approach to entrepreneurship shifts attention away from the personal traits and backgrounds of individual entrepreneurs, and towards how institutions shape entrepreneurial opportunities and actions; how entrepreneurs navigate their cognitive, normative, and regulatory environments; and, how actors modify and build institutions to support new types of organizations.

The Third Edition of International Accounting provides an overview of the broadly defined area of international accounting, but also focuses on the accounting issues related to international business activities and foreign operations. This edition also includes substantially updated coverage of the International Accounting Standards Board (IASB) and International Financial Reporting Standards (IFRS). The unique benefits of this textbook include its up-to-date coverage of relevant material, extensive numerical examples provided in most chapters, two chapters devoted to the application of International Financial Reporting Standards (IFRS), and coverage of nontraditional but important topics such as strategic accounting issues of multinational companies, international corporate governance, and corporate social responsibility reporting.

Solutions manual for sale to students provides full solutions for odd-numbered end-of-chapter assignment items, including questions, exercises, problems, and cases. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Public and private investors want timely, accurate financial information about institutions before investing. This requires adherence to internationally accepted financial disclosure standards. However, implementing these standards is a particular challenge for economies in transition from the Soviet-era central planning approach toward a market economy. The Asian Development Bank provided a technical assistance grant (TA 6505- REG) to build capacity to enhance financial disclosure standards in Armenia, Azerbaijan, and Georgia. The book is a compendium of the project's findings, activities, results, and recommendations. It discusses the rationale for the adoption of International Financial Reporting Standards and the enforcement of International Standards on Auditing by legal entities, and explores their use by small and medium-sized enterprises in the three countries. The book is a valuable guide to accountants, auditors, financial institutions, regulators, investors, governments, researchers, and others interested in financial disclosure practices and progress of these transitional nations.
