In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

A descriptive listing of the films produced during this decade is presented together with credit and subject indices

King Kong and The Thing from Another World are among the most popular horror and science fiction films of all time and both were made by RKO Radio Pictures. Between 1929 and 1956, RKO released more than 140 genre features, including The Most Dangerous Game, The Phantom of Crestwood, Before Dawn, The Monkey's Paw, The Hunchback of Notre Dame, You'll Find Out, The Spiral Staircase, The Enchanted Cottage, It's a Wonderful Life, Captive Women and Killers from Space. RKO is remembered for its series of psychological horror movies produced by Val Lewton, including Cat People, I Walked with a Zombie, The Seventh Victim and The Body Snatcher. The studio also

produced films in the adventure, comedy, fantasy, mystery and western genres. They released many Walt Disney classics—Snow White and the Seven Dwarfs, Fantasia, Pinocchio, Cinderella, Peter Pan—as well as several “Tarzan” features. This volume covers these movies in detail with critical and historical analysis, in-depth plot synopsis and numerous contemporary reviews.

Recounts the tale of Dumbo, the little elephant who turns his unusual feature--huge ears--into an asset when he learns to fly.

This book analyzes Walt Disney’s impact on entertainment, new media, and consumer culture in terms of a materialist, psychoanalytic approach to fantasy. The study opens with a taxonomy of narrative fantasy along with a discussion of fantasy as a key concept within psychoanalytic discourse. Zornado reads Disney’s full-length animated features of the “golden era” as symbolic responses to cultural and personal catastrophe, and presents Disneyland as a monument to Disney fantasy and one man’s singular, perverse desire. What follows after is a discussion of the “second golden age” of Disney and the rise of Pixar Animation as neoliberal nostalgia in crisis. The study ends with a reading of George Lucas as latter-day Disney and Star Wars as Disney fantasy. This study should appeal to film and media studies college undergraduates, graduates students and scholars interested in Disney.
