Sustainable Planet is a two-volume resource that provides comprehensive coverage on the world's most pressing environmental issues, their impact in countries around the world, and how—or if—they are being addressed. Sustainable Planet: Issues and Solutions for Our Environment's Future examines contemporary challenges to sustainability, including population, climate change, decreasing biodiversity, land degradation, and water quality. Each chapter analyzes one of these challenges by first providing an introduction to the topic as well as key concepts to provide readers with a basic understanding of the issue. Essays deepen comprehension by investigating different aspects of the challenge. Case studies written by experts in the field follow. Each case study considers how a specific country is affected by the particular issue as well as the measures the country is taking to find solutions that will provide for a more sustainable future. The final chapter of the book explores sustainability at a global level by examining, through annotated primary documents, a number of multinational initiatives and alliances intended to create a more sustainable planet. Delivers comprehensive content that builds on introductory material, culminating in case studies that examine real-world problems and solutions Examines the most important global sustainability issues as addressed by the United Nations and a number of sustainability degree programs across the country Provides annotated primary documents, furthering understanding of the issues explored in the book Includes interesting facts relevant to the discussion in sidebars generously sprinkled throughout the text

Managerial Accounting teaches students the fundamental concepts of managerial accounting in a concise and easy to comprehend fashion. Stimulating review materials at the end of each section helps students develop their decision-making skills. Students are provided the tools and guidance to take more initiative in their learning, making them more engaged, more prepared, and more confident.

This book is published open access under a CC BY 4.0 license. Over the past decades, rapid developments in digital and sensing technologies, such as the Cloud, Web and Internet of Things, have dramatically changed the way we live and work. The digital transformation is revolutionizing our ability to monitor our planet and transforming the way we access, process and exploit Earth Observation data from satellites. This book reviews these megatrends and their implications for the Earth Observation community as well as the wider data economy. It provides insight into new paradigms of Open Science and Innovation applied to space data, which are characterized by openness, access to large volume of complex data, wide availability of new community tools, new techniques for big data analytics such as Artificial Intelligence, unprecedented level of computing power, and new types of collaboration among researchers, innovators, entrepreneurs and citizen scientists. In addition, this book aims to provide readers with some reflections on the future of Earth Observation, highlighting through a series of use cases not just the new opportunities created by the New Space revolution, but also the new challenges that must be addressed in order to make the most of the large volume of complex and diverse data delivered by the new generation of satellites.

This study looks at how the rapid adoption of digital technologies could help developing countries increase their participation in world trade. It also reviews the role that domestic policies and international cooperation can play in creating a more prosperous and inclusive future for these countries. This publication marks the conclusion of the second phase of the WTO Chairs Programme (WCP), which aims to support and promote trade-related academic activities by universities and research institutions in developing and least-developed countries. The book brings together contributions from WCP chairholders, Advisory Board members, the WCP team at the WTO and other WTO Secretariat staff. The WCP is an important part of the WTO's efforts to build trade capacity and to work jointly with academic institutions in developing countries. Academic institutions awarded WTO Chairs receive support in the areas of curriculum development, research and outreach activities. The chairholders are selected through a competitive process. Fourteen institutions were originally selected as WTO Chairs for a four-year term in 2009. Seven institutions were added to the Programme in 2014.This publication consists of two volumes. The first volume, Overview and One-Page Case Summaries, contains a one-page summary for each identified GATT dispute, recording all relevant steps and documents, and indexes the information by relevant parties, agreements and provisions. The second volume, Dispute Settlement Procedures compiles for the first time all GATT dispute settlement procedures, as well as a selection of other key documents of historical interest.
