The EFI system will start easier and run smoother than the carbureted version. I'm not sure whether the 2.6L (150/175/200) version of the Ox66 had a cylinder management scheme but the 3.1L version (225/250) had such and it would run on 5 cylinders at idle to 850 RPM, 4 cylinders from 850+ to about 2000 RPM and then all 6 cylinders after 2000 RPM.

When choosing 4 stroke outboards – depending on the horsepower range you need for your craft – one of the decisions you ’ ll need to make is whether you want an electronic fuel-injected (EFI) engine or a standard, carbureted 4 stroke. From the Start. First, when it comes to starting 4 stroke outboards, an EFI engine has the advantage.

There are hundreds of large surface water bodies used to store drinking water supplies located throughout the United States and Canada. Some of these water bodies are already prime recreational attractions with strong economic and quality-of-life impacts upon their communities. Operational and boating management options can significantly reduce the levels of MTBE and other fuel-related contaminants. This report comprehensively evaluates these options to give practical data and advice to water managers who wish to consider the benefits of dual use without introducing unacceptable health risks into the water bodies being
